

Novel Coronavirus (COVID-19)

Do I need to wear a mask?

When to wear a mask?

The World Health Organization (WHO) recommends the use of masks only in specific cases:

If you are healthy, you only need to **wear a mask if you are taking care of a person** with suspected COVID-19 infection.

If you have **cough, fever, and difficulty breathing, wear a mask**, and seek medical care.

Masks are effective only when used **in combination with frequent hand-cleaning** with alcohol-based hand rub or soap and water.
